

# Integrated Care System Green Programme

Dear Colleague,

I am writing to let you know that Liz Mellor will be standing down from her role as the Senior Responsible Officer (SRO) for the Integrated Care System (ICS) Green programme with effect 30th April 2023.

## Under Liz's leadership, the programme will have:

- Published the ICS Green Delivery Plan 2023-25 which helps translate our strategic ambitions into operational plans for delivery
- Implemented a new governance framework to support delivery
- Established ICS wide Carbon Literacy Training to help raise awareness of how everybody across all ICS partners can contribute
- Established a baseline dashboard to set out the metrics that will evidence progress.

Liz will continue to lead the Greener NHS programme for North Staffordshire Combined Healthcare NHS Trust and we are now seeking expressions of interest from colleagues across our partner organisations who may wish to act as the SRO for delivery of the programme at system level. This opportunity might be suitable for colleagues looking for leadership stretch opportunity on the High Potential Scheme.

The Staffordshire and Stoke-on-Trent Integrated Care Board is in the process of securing additional programme management capacity to augment the coordination of this programme across all partners and to work closely with stakeholders. This resource will be available to support the SRO in their leadership of our ambitious programme of change.

For those who are interested in taking up this role, please make contact with me in the first instance.

**Chris Bird**

Chief Transformation Officer
